

EeviCare

Elevating Nurse Call for Aged Care

Introducing a modern architected nurse call system purpose built and designed to enhance the level of care for Australia's aged care communities.

2/36 Agnes St, Fortitude Valley QLD 4006

1300 802 738

About Us

Australian owned & operated, Eevi specialises in technologies to support the continuum of care for elderly Australians, wherever they choose to live.

RESEARCH LED

Design sprint approach and research based.

TECH STACK

Modern cloud architecture with best practice security

INDUSTRY EXPERIENCE

Operating across all aged care sectors.

DEVELOPMENT CAPABILITY

A highly experienced team

OUR IP

Full ownership of core devices & platforms

TRUSTED

Established operator supporting over 10,000 lives.

Our research has led us to solve for pain points others fail to see, or whose legacy systems prevent them from solving:

- Prevalence of memory loss and making it okay to wander safely
- Detection of falls, reliably and unobtrusively in real-time
- Need for the look and feel of a home, not a hospital
- Recognising residents as having stories of their own
- Observing changes in residents over time, unobtrusively
- Make it easy for carers, with simple tools and workflows
- Keep the place quiet and calm, by intelligently triaging alarms
- Get the right person at the right time with intelligent routing
- Keep staff safe, night and day
- Families need visibility and engagement in their loved ones lives

Elegant Design

We believe the best technologies are beautiful and easy to use. And the best care technologies have the look and feel of a home, not a hospital.

“

Care systems are a main issue we struggle to nail. We are not just a RACF, or just a Home Care Operator, or just a Retirement Village. There is no right system available to us.

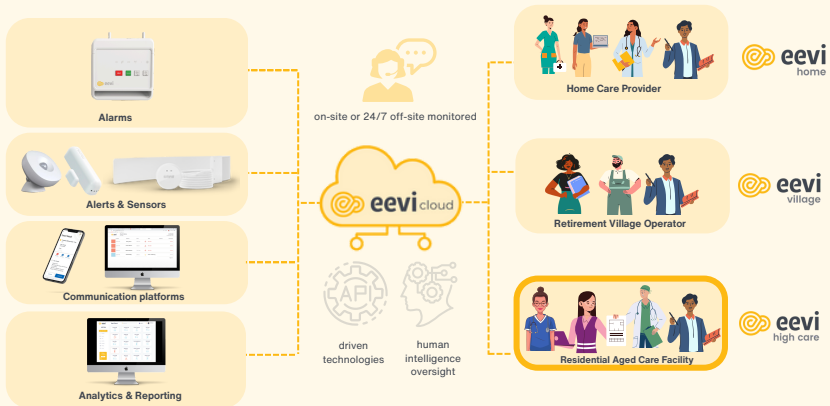

*Paul Brown,
Chairman, LDK Healthcare, 2020*

Continuum of Care

EviCare was built to solve the challenges faced by operators delivering the continuum of care. From independent and assisted living to aged care and memory loss.

Our technology is designed to adapt:

- to individuals' care needs as they change,
- to seamlessly integrate with workflows,
- to enhance staff and resident experiences,
- to empower you to make informed decisions to save time and money.

Care Technology solutions, built for the people who care.

Modern Architecture

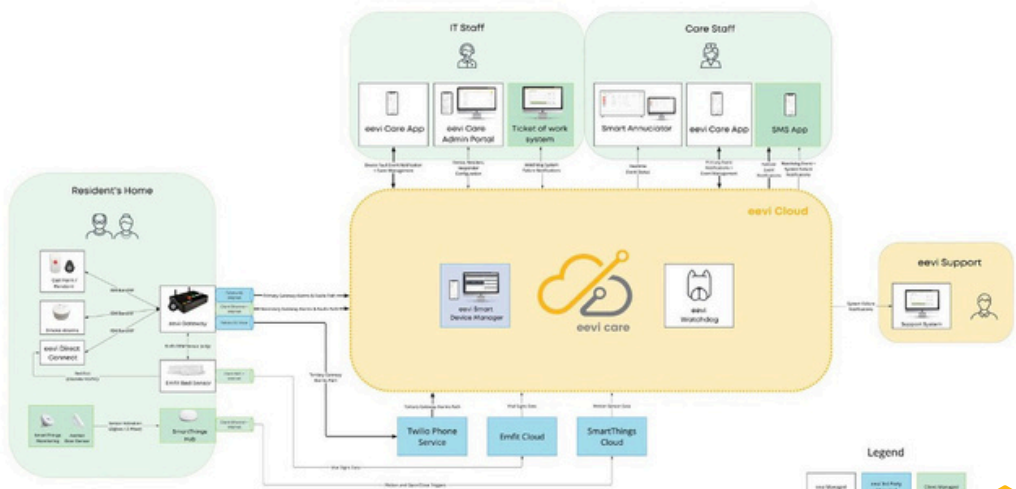

Developed in consultation with Australian aged care providers, the system reflects a deep understanding of local operational challenges and care models, making it an ideal fit for the Australian aged care landscape.

Employing

- Highly reliable edge computing
- Traditional nurse call peripherals
- Best-of-breed sensors for accurate data;
- Open integrations with operator platforms
- Intelligence (AI & ML) at the edge and core;
- Secure, cloud-based platform
- 99% uptime guaranteed

Delivering

- Flexibility (to personalise for care needs as they change)
- Elegant designs (it's a home, not a hospital)
- Traditional workflows (for easy transition)
- Intelligent triage and routing (for efficient operations)
- Clinical data and insights (to assist care planning and compliance)
- Safety and reliability (designed to ISO3100 standards).

Solution Components

Eevi NextGen IoT Nurse Call

- Eevi Gateway/Room Controller - highly reliable Nurse Call system with long-range two-way voice communication, sensitive microphone and dual speakers.
- Call points in customisable configurations with 1, 2 or 3 buttons per plate
- Wearable alarm buttons

Vayyar HDR Fall Detection sensor

- “Best in Class” high density radar technology which enables instant fall detection and continuous touchless monitoring of body movement.
- Operates in low light, steam, and humidity, ensuring resident safety and privacy with 4D imaging.
- Now with eevi Connect the solution is best in market for performance and reliability.

Emfit Bed Sensors

- “Best of Breed” global provider of Balistocardiography bed sensing technology.
- Accurate out of bed triggers together with sleep patterns, night routines and vital signs.
- Now with eevi Connect the solution is best in market for performance and reliability.

Kontakt.io Real Time Location Systems (RTLS)

- WiFi, Bluetooth and InfraRed signals to locate people, devices and tags on-site, real-time.
- Raise alarms for Events based on Residents proximity
- Automatically registers the carer presence when they arrive at a location.

Aotec Sensors

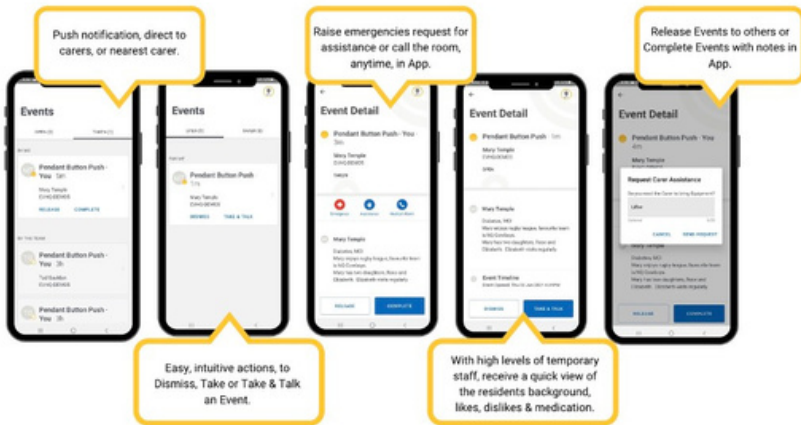

- An Activities of Daily Living ecosystem of discreet sensors delivering alerts when there is no activity, door exits, power usage and more.

Care Operations Software

EviCarer App

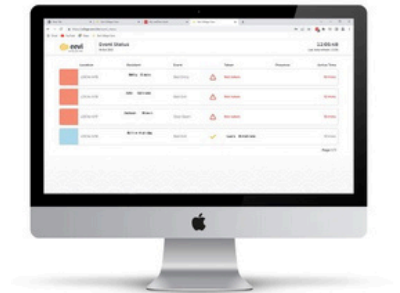

A communications platform offering carers a single view of all Event notifications.

Evi Smart Annunciator

Supporting care managers with information at a glance.

- ✓ Simple and intuitive
- ✓ Events Taken or Not
- ✓ Carer Present or Not
- ✓ Event Open Time
- ✓ Speed of response at a glance

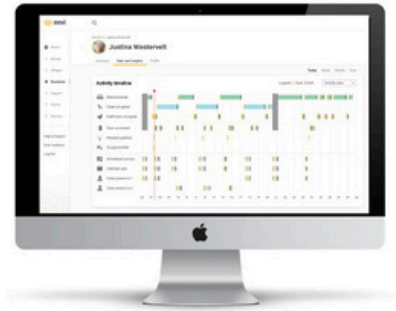

Care Operations Reporting

Eevi Resident Wellbeing

Supporting managers with rich behavioural insights and remote checking of resident status.

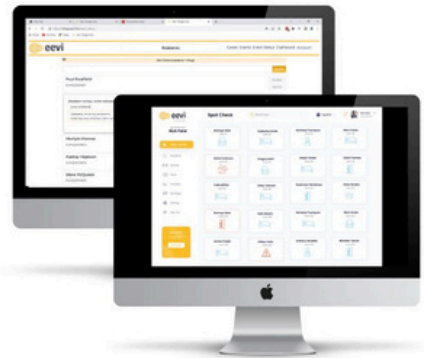

- ✔ Suspected fall
- ✔ Resident in chair/bed
- ✔ Resident on the move & door open
- ✔ Inactivity
- ✔ Carer present or not

EeviCare Console

A detailed view of resident information and devices, with easy to use Admin Portal.

- ✔ Real-time view of the resident
- ✔ View historical Event management
- ✔ Simple and intuitive
- ✔ Configurable devices & response groups
- ✔ Easily update resident details
- ✔ Virtual Spot Check- 2025 Roadmap

The fact eevi is open, wireless and cloud-based was a big advantage. Eevi's infrastructure gives us the flexibility to adopt and change.

*Byron Cannon,
CEO LDK Healthcare, 2024*

Why EeviCare?

Proud to be serving Australia's leading aged care & assisted living communities, Eevi is committed to the ongoing support for care teams in Australia. Our system:

- ✔ Leading technology enabling analytics & insights
- ✔ Saves time and money compared to traditional systems
- ✔ Aligns with your operations and performance indicators
- ✔ Supports best practice operations and compliance
